## DETAILED ACTION

### ***Response to Arguments***

Applicant's arguments filed February 16, 2006 have been fully considered but they are not persuasive.

The Applicant states that "electroplating produces a surface layer which is clearly distinct from the underlying substrate, although attached to it..." However, the coating, once bonded with the substrate, can now be considered as integral with the substrate. The Applicant fails to specifically define "integral" within the specification. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., interdiffusion of metal...) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims.

See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 13-18 remain rejected under 35 U.S.C. 102(b) as being anticipated by Ogle (6,113,636 A). Ogle discloses an implant comprising a metal substrate and a surface layer, the layer comprising silver as a biocidal metal. Please

note that product by process claims are NOT limited to the manipulations of the recited steps, only to the structure implied by the steps. Therefore method steps such as "generated by" or "wherein the surface of the implant is highly polished before provision of the surface layer" are given limited weight because the structure of the product is the same as claimed.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
